Global Energy Shifts: Fostering Sustainability in a Turbulent Age

Bruce Podobnik

Global Energy Shifts: Fostering Sustainability in a Turbulent Age Bruce Podobnik

In the year 1900, the industrial world was almost entirely reliant on coal for its commercial energy. Only 50 years later, a new system - based on oil - had spread across the entire globe. By the end of the twentieth century, yet another system - based on natural gas - was achieving world-wide diffusion. *Global Energy Shifts* explores the societal forces that led to the expansion of these energy systems and demonstrates that the convergence of specific geopolitical, commercial, and social conditions can generate rapid and far-reaching transformations in the energy foundations of our world. In an important concluding chapter, Podobnik describes opportunities for fostering a similarly rapid shift toward renewable energy systems in the twenty-first century drawing on lessons from world history.
