SemProM: Foundations of Semantic Product Memories for the Internet of Things (Cognitive Technologies)

SemProM: Foundations of Semantic Product Memories for the Internet of Things (Cognitive Technologies)

The development of low-cost, compact digital storage, sensors and radio modules allows us to embed digital memories into products to record key events. Such computationally enhanced products can perceive and control their environment, analyze their observations, and communicate with other smart objects and human users. Digital product memories (DPMs) will play a key role in the upcoming fourth industrial revolution based on cyber-physical production systems, resulting in improvements in traceability and quality assurance, more efficient and flexible production, logistics, customization, and recycling, and better information for the consumer.

SemProM was a major industrial and academic research project that examined all aspects of the design and implementation of semantic product memories, and this book is a comprehensive assessment of the results achieved. The introductory chapters explain the fundamental ideas and the organization of the related project, while the remaining parts explain how to build, model and process DPMs, multimodal interaction using them, and selected applications.

This work is inherently multidisciplinary and the related ideas, technologies, and implementations draw on results in fields such as semantic technologies, machine-to-machine communication, intelligent sensor networks, instrumented environments, embedded systems, smart objects, RFID technology, security, and privacy. The contributing authors are leading scientists and engineers, representing key academic teams and companies.

The book explains successful deployment in applications such as manufacturing, green logistics, retail, healthcare, and food distribution, and it will be of value to both researchers and practitioners.

From reader reviews:

Jean Smith:

This SemProM: Foundations of Semantic Product Memories for the Internet of Things (Cognitive Technologies) book is simply not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is usually information inside this guide incredible fresh, you will get facts which is getting deeper anyone read a lot of information you will get. This kind of SemProM: Foundations of Semantic Product Memories for the Internet of Things (Cognitive Technologies) without we know teach the one who looking at it become critical in pondering and analyzing. Don't possibly be worry SemProM: Foundations of Semantic Product Memories for the Internet of Things (Cognitive Technologies) can bring if you are and not make your case space or bookshelves' turn out to be full because you can have it inside your lovely laptop even cell phone. This SemProM: Foundations of Semantic Product Memories for the Internet of Things (Cognitive Technologies) having good arrangement in word in addition to layout, so you will not truly feel uninterested in reading.

Sheila Donovan:

Hey guys, do you wants to finds a new book to see? May be the book with the subject SemProM: Foundations of Semantic Product Memories for the Internet of Things (Cognitive Technologies) suitable to you? Typically the book was written by popular writer in this era. The book untitled SemProM: Foundations of Semantic Product Memories for the Internet of Things (Cognitive Technologies)is a single of several books that will everyone read now. This book was inspired many men and women in the world. When you read this reserve you will enter the new dimension that you ever know just before. The author explained their idea in the simple way, and so all of people can easily to recognise the core of this guide. This book will give you a large amount of information about this world now. To help you to see the represented of the world in this particular book.

Leo Osborne:

Exactly why? Because this SemProM: Foundations of Semantic Product Memories for the Internet of Things (Cognitive Technologies) is an unordinary book that the inside of the e-book waiting for you to snap the idea but latter it will zap you with the secret this inside. Reading this book close to it was fantastic author who all write the book in such incredible way makes the content on the inside easier to understand, entertaining way but still convey the meaning entirely. So , it is good for you for not hesitating having this ever again or you going to regret it. This phenomenal book will give you a lot of rewards than the other book include such as help improving your skill and your critical thinking means. So , still want to postpone having that book? If I were being you I will go to the reserve store hurriedly.

Theresa Frost:

Many people spending their time frame by playing outside with friends, fun activity using family or just

watching TV the entire day. You can have new activity to pay your whole day by looking at a book. Ugh, do you think reading a book will surely hard because you have to accept the book everywhere? It fine you can have the e-book, bringing everywhere you want in your Smartphone. Like SemProM: Foundations of Semantic Product Memories for the Internet of Things (Cognitive Technologies) which is obtaining the e-book version. So , why not try out this book? Let's see.
