The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture Don Cummings, Robert Dalrymple, Kyungsik Choi, Jaehwa Jin

The Tide-Dominated Han River Delta provides a thorough analysis of a river delta in which tidal currents have reworked the river-borne sediment, generating characteristic geomorphological and sedimentological signatures in the process. Such "tide-dominated" deltas are common in the modern ocean, forming the substrate upon which entire populations are built. Furthermore, ancient examples contain enormous volumes of hydrocarbon. Despite this, tide-dominated deltas remain less well understood than their wave- and river-dominated counterparts, largely because processes within them are inherently more complex and fewer modern examples have been investigated in detail.

This multi-year study by a team of experts in coastal geoscience represents the most complete documentation of a tide-dominated delta to date. Results help advance, and are applicable to, a broad range of fields within sedimentary geology, including clastic sedimentology, seismic and sequence stratigraphy, and coastal geomorphology, in addition to petroleum geology and reservoir engineering.

- Offers new access to results of a multi-year hydrocarbon-reservoir analogue study not available elsewhere.
- Features 75 full-color figures and illustrations to emphasize critical aspects of the delta's sedimentology, geomorphology, and stratigraphy.
- Provides basic data that better define what tide-dominated deltas are, how these complex systems behave over time, and why this is so.
- Aids petroleum geologists and reservoir engineers in predicting the distribution of baffles and barriers in tide-dominated sediment bodies, helping in the successful development of reservoirs.

From reader reviews:

Mark Carter:

Why don't make it to become your habit? Right now, try to ready your time to do the important act, like looking for your favorite reserve and reading a e-book. Beside you can solve your problem; you can add your knowledge by the e-book entitled The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture. Try to the actual book The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture as your close friend. It means that it can to become your friend when you truly feel alone and beside regarding course make you smarter than previously. Yeah, it is very fortunated for you personally. The book makes you more confidence because you can know almost everything by the book. So , we should make new experience along with knowledge with this book.

Stephen Stovall:

Do you one among people who can't read enjoyable if the sentence chained inside straightway, hold on guys that aren't like that. This The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture book is readable by you who hate the straight word style. You will find the details here are arrange for enjoyable reading experience without leaving possibly decrease the knowledge that want to provide to you. The writer associated with The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture content conveys objective easily to understand by most people. The printed and e-book are not different in the written content but it just different available as it. So , do you nevertheless thinking The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture is not loveable to be your top checklist reading book?

Alberta Townsend:

Often the book The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture will bring someone to the new experience of reading any book. The author style to explain the idea is very unique. In the event you try to find new book to read, this book very acceptable to you. The book The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture is much recommended to you to study. You can also get the e-book in the official web site, so you can quickly to read the book.

Diana Slama:

Is it anyone who having spare time subsequently spend it whole day by means of watching television programs or just laying on the bed? Do you need something new? This The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture can be the answer, oh how comes? It's a book you know. You are and so out of date, spending your spare time by reading in this

completely new era is common not a geek activity. So what these guides have than the others?
