Alternative Energy Sources (Green Energy and Technology) Efstathios E. Stathis Michaelides

Alternative Energy Sources is designed to give the reader, a clear view of the role each form of alternative energy may play in supplying the energy needs of the human society in the near future (20-50 years).

The two first chapters on "energy demand and supply" and "environmental effects," set the tone as to why alternative energy is essential for the future. The third chapter gives the laws of energy conversion processes, as well as the limitations of converting one energy form to another. The section on exergy gives a quantitative background on the capability/potential of each energy source to produce power. The fourth, fifth and sixth chapters are expositions of fission and fusion nuclear energy, the power plants that may produce power from these sources and the issues that will frame the public debate on nuclear energy. The following five chapters include descriptions of the most common renewable energy sources (wind, solar, geothermal, biomass, hydroelectric) some of the less common sources (e.g. tidal and wave energy). The emphasis of these chapters will be on the global potential of each source, the engineering/technical systems that are used in harnessing the potential of each source, the technological developments that will contribute to wider utilization of the sources and environmental effects associated with their wider use. The last three chapters are: "energy storage," which will become an important issue if renewable energy sources are used widely.

The fourteen chapters in the book have been chosen so that one may fit a semester University course around this book. At the end of every chapter, there are 10-20 problems and 1-3 suggestions of semester projects that may be assigned to students for further research.

From reader reviews:

James Edwards:

What do you regarding book? It is not important together with you? Or just adding material when you want something to explain what the ones you have problem? How about your time? Or are you busy particular person? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Every individual has many questions above. The doctor has to answer that question because just their can do in which. It said that about e-book. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need this Alternative Energy Sources (Green Energy and Technology) to read.

Richard Freed:

The experience that you get from Alternative Energy Sources (Green Energy and Technology) is the more deep you digging the information that hide inside words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to know but Alternative Energy Sources (Green Energy and Technology) giving you buzz feeling of reading. The copy writer conveys their point in selected way that can be understood by anyone who read it because the author of this reserve is well-known enough. This specific book also makes your own personal vocabulary increase well. Making it easy to understand then can go along with you, both in printed or e-book style are available. We recommend you for having this kind of Alternative Energy Sources (Green Energy and Technology) instantly.

Joseph Yancey:

Reading a e-book can be one of a lot of exercise that everyone in the world adores. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a book will give you a lot of new info. When you read a publication you will get new information since book is one of various ways to share the information or maybe their idea. Second, looking at a book will make a person more imaginative. When you looking at a book especially tale fantasy book the author will bring that you imagine the story how the figures do it anything. Third, you could share your knowledge to other people. When you read this Alternative Energy Sources (Green Energy and Technology), you can tells your family, friends and soon about yours e-book. Your knowledge can inspire others, make them reading a e-book.

Melinda Walton:

A lot of publication has printed but it differs from the others. You can get it by online on social media. You can choose the very best book for you, science, comedy, novel, or whatever by simply searching from it. It is named of book Alternative Energy Sources (Green Energy and Technology). You can include your knowledge by it. Without leaving the printed book, it may add your knowledge and make you actually happier to read. It is most crucial that, you must aware about reserve. It can bring you from one place to other place.
