Multivariate Survival Analysis and Competing Risks (Chapman & Hall/CRC Texts in Statistical Science) Martin J. Crowder

Multivariate Survival Analysis and Competing Risks introduces univariate survival analysis and extends it to the multivariate case. It covers competing risks and counting processes and provides many real-world examples, exercises, and R code. The text discusses survival data, survival distributions, frailty models, parametric methods, multivariate data and distributions, copulas, continuous failure, parametric likelihood inference, and non- and semi-parametric methods.

There are many books covering survival analysis, but very few that cover the multivariate case in any depth. Written for a graduate-level audience in statistics/biostatistics, this book includes practical exercises and R code for the examples. The author is renowned for his clear writing style, and this book continues that trend. It is an excellent reference for graduate students and researchers looking for grounding in this burgeoning field of research.

From reader reviews:

Mollie Walker:

What do you about book? It is not important along? Or just adding material if you want something to explain what the one you have problem? How about your extra time? Or are you busy man? If you don't have spare time to accomplish others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Every individual has many questions above. They need to answer that question mainly because just their can do this. It said that about guide. Book is familiar on every person. Yes, it is suitable. Because start from on kindergarten until university need that Multivariate Survival Analysis and Competing Risks (Chapman & Hall/CRC Texts in Statistical Science) to read.

Frank Hall:

Information is provisions for anyone to get better life, information presently can get by anyone in everywhere. The information can be a expertise or any news even a concern. What people must be consider whenever those information which is inside the former life are challenging to be find than now could be taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you obtain the unstable resource then you obtain it as your main information there will be huge disadvantage for you. All those possibilities will not happen inside you if you take Multivariate Survival Analysis and Competing Risks (Chapman & Hall/CRC Texts in Statistical Science) as the daily resource information.

John Reed:

This book untitled Multivariate Survival Analysis and Competing Risks (Chapman & Hall/CRC Texts in Statistical Science) to be one of several books that best seller in this year, that is because when you read this e-book you can get a lot of benefit on it. You will easily to buy this book in the book store or you can order it by means of online. The publisher on this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Smart phone. So there is no reason to you personally to past this book from your list.

Walter Crouse:

The particular book Multivariate Survival Analysis and Competing Risks (Chapman & Hall/CRC Texts in Statistical Science) has a lot details on it. So when you make sure to read this book you can get a lot of profit. The book was published by the very famous author. The writer makes some research just before write this book. This specific book very easy to read you can get the point easily after reading this article book.
