Equations in Mathematical Physics V.P. Pikulin, Stanislav I. Pohozaev, S. Pohozaev

Many physical processes in fields such as mechanics, thermodynamics, electricity, magnetism or optics are described by means of partial differential equations. The aim of the present book is to demonstrate the basic methods for solving the classical linear problems in mathematical physics of elliptic, parabolic and hyperbolic type. In particular, the methods of conformal mappings, Fourier analysis and Green's functions are considered, as well as the perturbation method and integral transformation method, among others. Every chapter contains concrete examples with a detailed analysis of their solution.

The book is intended as a textbook for students in mathematical physics, but will also serve as a handbook for scientists and engineers.

From reader reviews:

Ruth Mahan:

Here thing why this specific Equations in Mathematical Physics are different and reputable to be yours. First of all reading a book is good but it depends in the content than it which is the content is as scrumptious as food or not. Equations in Mathematical Physics giving you information deeper including different ways, you can find any guide out there but there is no reserve that similar with Equations in Mathematical Physics. It gives you thrill reading through journey, its open up your own eyes about the thing this happened in the world which is probably can be happened around you. You can actually bring everywhere like in area, café, or even in your technique home by train. When you are having difficulties in bringing the printed book maybe the form of Equations in Mathematical Physics in e-book can be your alternative.

Willie Wilson:

Are you kind of occupied person, only have 10 or even 15 minute in your moment to upgrading your mind skill or thinking skill even analytical thinking? Then you have problem with the book than can satisfy your short period of time to read it because this all time you only find guide that need more time to be go through. Equations in Mathematical Physics can be your answer as it can be read by you who have those short time problems.

Ann Gonzalez:

A lot of reserve has printed but it differs from the others. You can get it by internet on social media. You can choose the best book for you, science, comedian, novel, or whatever through searching from it. It is called of book Equations in Mathematical Physics. You'll be able to your knowledge by it. Without departing the printed book, it might add your knowledge and make anyone happier to read. It is most critical that, you must aware about e-book. It can bring you from one place to other place.

Howard Foster:

Publication is one of source of knowledge. We can add our knowledge from it. Not only for students and also native or citizen need book to know the up-date information of year in order to year. As we know those books have many advantages. Beside we add our knowledge, also can bring us to around the world. With the book Equations in Mathematical Physics we can consider more advantage. Don't someone to be creative people? To become creative person must prefer to read a book. Merely choose the best book that ideal with your aim. Don't become doubt to change your life with that book Equations in Mathematical Physics. You can more pleasing than now.
