Handbook of Evidence-Based Critical Care

Paul Ellis Marik

Handbook of Evidence-Based Critical Care Paul Ellis Marik

This is the first bedside pocket reference ever published in evidence-based Critical Care Medicine. It is designed to act as a complement to and precede the forthcoming, larger shelf reference by Zaloga and Marik on Evidence-Based Critical Care Medicine. Its purpose will be to provide easy access to clinical data which is crucial in therapeutic decision-making. This approach will enable the clinician to quickly review the information which will support or refute an intervention and choose the most appropriate, cost-effective treatment. The analysis of treatment strategies will be presented by organ-systems, and there will be miscellaneous ICU topics (eg: severity of illness scoring systems, nutrition, toxicology, infection) covered. The selection of these topics will be based on the most frequently found and difficult to solve problems in ICU patient management.
