Homo sapiens cyborgicus: A Brief Essay Curtis R Crim

This book examines the impact upon human genes due to the rapid increase in the evolution of technology. Rapid changes in cultural and environmental conditions cause a response in human DNA caused the necessity to adapt to these changing conditions in order to survive. The recent computer/digital revolution is causing a tremendous impact on human cultures and therefore the environment in which they live. In this book, I address what kinds of changes we can expect in our physical and mental evolution caused by the impact of the hurricane of digital computer and mobile technology that has now become our daily environment.
