The student-friendly fourth edition of *Motor Learning and Performance: A Situation-Based Learning Approach* expands on the fundamentals of motor performance and learning, providing valuable supporting literature and current research results in an accessible and engaging format. This text goes beyond simply presenting the latest research. Instead, Schmidt and Wrisberg challenge students not only to grasp but also to apply the fundamental concepts of motor performance and learning via a unique situation-based approach. Movement practitioners using this approach continually ask three basic questions to assist people in motor learning: who (the person learning or performing), where (the context for learning or performing), and what (the task being learned or performed). By working through situation-based exercises and case studies, students learn how to ask appropriate questions, identify solutions, and support their answers with theory or research.

Motor Learning and Performance: A Situation-Based Learning Approach outlines the principles of motor skill learning, develops a conceptual model of human performance, and shows students how to apply the concepts of motor learning and performance to a variety of real-world settings, including teaching, coaching, the design of performer-friendly equipment and work environments, rehabilitation, and everyday motor skill learning. Straightforward explanations of motor skill concepts and accompanying research are reinforced with both ordinary and extraordinary examples of motor skill activities, such as driving a car, playing the banjo, and mountain climbing. By applying the concepts of motor learning to familiar scenarios, the material comes alive for students, leading to better retention of information and greater interest in the application of motor performance and learning in their everyday lives and future careers.

More than 76 new references, exercises, updated figures and photos, and improved chapter features make the fourth edition of *Motor Learning and Performance: A Situation-Based Learning Approach* the most user-friendly edition to date. Each chapter is organized to include an outline listing the major topics to be presented, objectives that alert students to key content for mastery, an opening case study that previews the content within the context of a real-life example, research highlight boxes to provide more detailed descriptions of important experiments and concepts, and a running glossary for instant definitions of terms as they are introduced in the text. In addition, the authors make the text even more reader friendly with these elements:

-It Depends sections require students to identify factors that might influence motor performance and learning situations.

-From Principles to Practice sections simplify self-testing of key terms by reviewing and providing exercises to apply the information to real-life situations.

-Special notes with interesting facts and quotes provide supplemental information.

-A summary with a compilation of important concepts wraps up each chapter.

-Four additional in-depth case studies are featured in the final chapter.

New and convenient online instructor resources are also available to course adopters of this updated text. The ancillary materials include an expanded instructor guide with chapter summary notes and additional situation-based exercises for class discussion, a presentation package of PowerPoint slides for lectures, and a test bank.

Motor Learning and Performance: A Situation-Based Learning Approach, Fourth Edition, continues to combine a conceptual model of human performance with a situation-based learning approach, making comprehension of the principles of motor performance and learning accessible even for readers with little or no knowledge of physiology, psychology, statistical methods, and other basic sciences. In combination with the additional instructor resources and new online student study guide with lab activities, this text will help

gradually shift responsibility for learning and applying the information to the student and discourage memorization and regurgitation. There is no better introduction to the fascinating field of motor learning and its many applications in the real world.

Includes an online study guide!

To assist students using the text, *Motor Learning and Performance, Fourth Edition*, has a companion online student study guide with lab activities that bring the material to life for students. Students will receive free access to the study guide with the purchase of a new text, or it may be purchased as a separate component. The online study guide will help students understand and apply theories and research findings with the following tools:

-Key concepts, key terms, and review questions for each chapter

-Situation-based exercises to solve, each with two different student responses, an evaluation of each response, and a challenge for students to provide their own responses to the exercise on the worksheet template provided (30 total)

-Practical laboratory activities, with chapter-related questions, examples, tables, and other relevant learning activities that may be printed out and handed in (20 total)

From reader reviews:

Kevin White:

What do you think about book? It is just for students since they're still students or the item for all people in the world, what the best subject for that? Just simply you can be answered for that concern above. Every person has various personality and hobby for each and every other. Don't to be forced someone or something that they don't want do that. You must know how great as well as important the book Motor Learning and Performance With Web Study Guide - 4th Edition: A Situation-Based Learning Approach. All type of book can you see on many sources. You can look for the internet solutions or other social media.

David Shields:

The knowledge that you get from Motor Learning and Performance With Web Study Guide - 4th Edition: A Situation-Based Learning Approach is a more deep you searching the information that hide inside the words the more you get considering reading it. It does not mean that this book is hard to know but Motor Learning and Performance With Web Study Guide - 4th Edition: A Situation-Based Learning Approach giving you enjoyment feeling of reading. The copy writer conveys their point in specific way that can be understood by anyone who read that because the author of this e-book is well-known enough. This book also makes your own personal vocabulary increase well. It is therefore easy to understand then can go along with you, both in printed or e-book style are available. We suggest you for having this kind of Motor Learning and Performance With Web Study Guide - 4th Edition: A Situation-Based Learning Approach instantly.

Nicholas Valles:

Playing with family within a park, coming to see the marine world or hanging out with friends is thing that usually you may have done when you have spare time, subsequently why you don't try issue that really opposite from that. A single activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Motor Learning and Performance With Web Study Guide - 4th Edition: A Situation-Based Learning Approach, you may enjoy both. It is good combination right, you still want to miss it? What kind of hang-out type is it? Oh occur its mind hangout men. What? Still don't have it, oh come on its referred to as reading friends.

Maria Blanco:

Many people spending their time frame by playing outside having friends, fun activity together with family or just watching TV the entire day. You can have new activity to enjoy your whole day by examining a book. Ugh, think reading a book can definitely hard because you have to accept the book everywhere? It alright you can have the e-book, getting everywhere you want in your Smart phone. Like Motor Learning and Performance With Web Study Guide - 4th Edition: A Situation-Based Learning Approach which is obtaining the e-book version. So , why not try out this book? Let's see.
