New Directions in Conservation Medicine: Applied Cases of Ecological Health

New Directions in Conservation Medicine: Applied Cases of Ecological Health

In recent years, species and ecosystems have been threatened by many anthropogenic factors manifested in local and global declines of populations and species. Although we consider conservation medicine an emerging field, the concept is the result of the long evolution of transdisciplinary thinking within the health and ecological sciences and the better understanding of the complexity within these various fields of knowledge. Conservation medicine was born from the cross fertilization of ideas generated by this new transdisciplinary design. It examines the links among changes in climate, habitat quality, and land use; emergence and re-emergence of infectious agents, parasites and environmental contaminants; and maintenance of biodiversity and ecosystem functions as they sustain the health of plant and animal communities including humans.

During the past ten years, new tools and institutional initiatives for assessing and monitoring ecological health concerns have emerged: landscape epidemiology, disease ecological modeling and web-based analytics. New types of integrated ecological health assessment are being deployed; these efforts incorporate environmental indicator studies with specific biomedical diagnostic tools. Other innovations include the development of non-invasive physiological and behavioral monitoring techniques; the adaptation of modern molecular biological and biomedical techniques; the design of population level disease monitoring strategies; the creation of ecosystem-based health and sentinel species surveillance approaches; and the adaptation of health monitoring systems for appropriate developing country situations. *New Directions of Conservation Medicine: Applied Cases of Ecological Health* addresses these issues with relevant case studies and detailed applied examples. *New Directions of Conservation Medicine* challenges the notion that human health is an isolated concern removed from the bounds of ecology and species interactions. Human health, animal health, and ecosystem health are moving closer together and at some point, it will be inconceivable that there was ever a clear division.

From reader reviews:

John Jonas:

Book is to be different for every grade. Book for children until eventually adult are different content. To be sure that book is very important for all of us. The book New Directions in Conservation Medicine: Applied Cases of Ecological Health was making you to know about other know-how and of course you can take more information. It is quite advantages for you. The guide New Directions in Conservation Medicine: Applied Cases of Ecological Health is not only giving you much more new information but also to be your friend when you truly feel bored. You can spend your personal spend time to read your guide. Try to make relationship using the book New Directions in Conservation Medicine: Applied Cases of Ecological Health. You never sense lose out for everything when you read some books.

Robert Sanders:

The book New Directions in Conservation Medicine: Applied Cases of Ecological Health has a lot info on it. So when you make sure to read this book you can get a lot of help. The book was authored by the very famous author. This articles author makes some research just before write this book. This specific book very easy to read you can obtain the point easily after looking over this book.

Freddie Valdez:

Does one one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Aim to pick one book that you never know the inside because don't evaluate book by its cover may doesn't work is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside appearance likes. Maybe you answer might be New Directions in Conservation Medicine: Applied Cases of Ecological Health why because the wonderful cover that make you consider regarding the content will not disappoint a person. The inside or content is usually fantastic as the outside as well as cover. Your reading sixth sense will directly show you to pick up this book.

Jason Savage:

Some people said that they feel bored when they reading a book. They are directly felt that when they get a half parts of the book. You can choose typically the book New Directions in Conservation Medicine: Applied Cases of Ecological Health to make your own personal reading is interesting. Your current skill of reading ability is developing when you such as reading. Try to choose very simple book to make you enjoy to learn it and mingle the idea about book and looking at especially. It is to be initial opinion for you to like to wide open a book and learn it. Beside that the publication New Directions in Conservation Medicine: Applied Cases of Ecological Health can to be your brand new friend when you're really feel alone and confuse in what must you're doing of their time.
