**Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences)** David W. Kaplan

"Wise social scientists will make a beeline for the 2<sup>nd</sup> edition of David Kaplan's classic text. An essential read for students and professionals who want to move beyond cookbook presentations with checklists towards deeper understanding and thoughtful application."

?Judith D. Singer, *Harvard University*

Using detailed, empirical examples, **Structural Equation Modeling, Second Edition**, presents a thorough and sophisticated treatment of the foundations of structural equation modeling (SEM). It also demonstrates how SEM can provide a unique lens on the problems social and behavioral scientists face.

Thoroughly revised to address recent developments, this new edition includes:

- The foundations of SEM, including path analysis and factor analysis.
- Traditional SEM for continuous latent variables, including latent growth curve modeling for continuous growth factors, and issues in testing assumptions of SEM.
- SEM for categorical latent variables, including latent class analysis, Markov models (latent and mixed latent), and growth mixture modeling.
- Philosophical issues in the practice of SEM, including the problem of causal inference.

## Intended Audience

While the book assumes some knowledge and background in statistics, it guides readers through the foundations and critical assumptions of SEM in an easy-to-understand manner.

### **From reader reviews:**

#### **George Nygaard:**

Inside other case, little persons like to read book Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences). You can choose the best book if you'd prefer reading a book. So long as we know about how is important the book Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences). You can add expertise and of course you can around the world by the book. Absolutely right, because from book you can know everything! From your country until finally foreign or abroad you may be known. About simple point until wonderful thing you could know that. In this era, we can easily open a book as well as searching by internet device. It is called e-book. You need to use it when you feel bored stiff to go to the library. Let's learn.

#### **Patricia Steele:**

What do you think about book? It is just for students since they're still students or that for all people in the world, what the best subject for that? Simply you can be answered for that question above. Every person has several personality and hobby per other. Don't to be obligated someone or something that they don't desire do that. You must know how great and important the book Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences). All type of book are you able to see on many methods. You can look for the internet sources or other social media.

#### **George Bash:**

This Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences) is brand new way for you who has fascination to look for some information as it relief your hunger associated with. Getting deeper you onto it getting knowledge more you know otherwise you who still having small amount of digest in reading this Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences) can be the light food for you personally because the information inside that book is easy to get by simply anyone. These books create itself in the form that is certainly reachable by anyone, yep I mean in the e-book web form. People who think that in e-book form make them feel drowsy even dizzy this guide is the answer. So there is not any in reading a guide especially this one. You can find what you are looking for. It should be here for a person. So , don't miss the idea! Just read this e-book variety for your better life and knowledge.

#### **Joshua Miner:**

As a scholar exactly feel bored for you to reading. If their teacher expected them to go to the library as well as to make summary for some guide, they are complained. Just very little students that has reading's soul or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading really. Any students feel that examining is not important, boring along with

can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Structural Equation Modeling: Foundations and Extensions (Advanced Quantitative Techniques in the Social Sciences) can make you really feel more interested to read.
