Traveling Wave Analysis of Partial Differential Equations: Numerical and Analytical Methods with Matlab and Maple Graham W. Griffiths, William E. Schiesser

Although the Partial Differential Equations (PDE) models that are now studied are usually beyond traditional mathematical analysis, the numerical methods that are being developed and used require testing and validation. This is often done with PDEs that have known, exact, analytical solutions. The development of analytical solutions is also an active area of research, with many advances being reported recently, particularly traveling wave solutions for nonlinear evolutionary PDEs. Thus, the current development of analytical solutions directly supports the development of numerical methods by providing a spectrum of test problems that can be used to evaluate numerical methods.

This book surveys some of these new developments in analytical and numerical methods, and relates the two through a series of PDE examples. The PDEs that have been selected are largely "named" since they carry the names of their original contributors. These names usually signify that the PDEs are widely recognized and used in many application areas. The authors' intention is to provide a set of numerical and analytical methods based on the concept of a traveling wave, with a central feature of conversion of the PDEs to ODEs.

The Matlab and Maple software will be available for download from this website shortly.

www.pdecomp.net

- Includes a spectrum of applications in science, engineering, applied mathematics
- Presents a combination of numerical and analytical methods
- Provides transportable computer codes in Matlab and Maple

From reader reviews:

James Shaw:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite book and reading a publication. Beside you can solve your trouble; you can add your knowledge by the e-book entitled Traveling Wave Analysis of Partial Differential Equations: Numerical and Analytical Methods with Matlab and Maple. Try to make the book Traveling Wave Analysis of Partial Differential Equations: Numerical and Analytical Methods with Matlab and Maple as your good friend. It means that it can being your friend when you experience alone and beside associated with course make you smarter than in the past. Yeah, it is very fortunated in your case. The book makes you much more confidence because you can know every little thing by the book. So , we should make new experience in addition to knowledge with this book.

Nicole Oneal:

Information is provisions for folks to get better life, information presently can get by anyone from everywhere. The information can be a expertise or any news even a huge concern. What people must be consider any time those information which is from the former life are challenging be find than now's taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you have the unstable resource then you buy it as your main information there will be huge disadvantage for you. All of those possibilities will not happen throughout you if you take Traveling Wave Analysis of Partial Differential Equations: Numerical and Analytical Methods with Matlab and Maple as your daily resource information.

Charlie Attwood:

Your reading sixth sense will not betray an individual, why because this Traveling Wave Analysis of Partial Differential Equations: Numerical and Analytical Methods with Matlab and Maple publication written by well-known writer who knows well how to make book which can be understand by anyone who also read the book. Written within good manner for you, dripping every ideas and publishing skill only for eliminate your personal hunger then you still hesitation Traveling Wave Analysis of Partial Differential Equations: Numerical and Analytical Methods with Matlab and Maple as good book not only by the cover but also with the content. This is one e-book that can break don't judge book by its cover, so do you still needing another sixth sense to pick this kind of!? Oh come on your studying sixth sense already said so why you have to listening to an additional sixth sense.

Tamela Campbell:

What is your hobby? Have you heard this question when you got learners? We believe that that question was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you know

that little person just like reading or as reading through become their hobby. You should know that reading is very important along with book as to be the thing. Book is important thing to provide you knowledge, except your own teacher or lecturer. You will find good news or update regarding something by book. A substantial number of sorts of books that can you take to be your object. One of them is actually Traveling Wave Analysis of Partial Differential Equations: Numerical and Analytical Methods with Matlab and Maple.
