Advances in Quantitative Analysis of Finance and Accounting, Volume 9 (Advances in Quantitative Analysis of Finance and Accounting) Cheng-Few Lee

"Advances in Quantitative Analysis of Finance and Accounting" is an annual publication designed to disseminate developments in the quantitative analysis of finance and accounting. The publication is a forum for statistical and quantitative analyses of issues in finance and accounting as well as applications of quantitative methods to problems in financial management, financial accounting, and business management. The objective is to promote interaction between academic research in finance and accounting and applied research in the financial community and the accounting profession. The papers in this volume cover a wide range of topics including default risk premiums, multi-period contracts, stock market, impact of earnings change on stock price, bank regulation, dividend effect of closed-end mutual funds, income smoothing, and inflation accounting.
