Differential Equations and Boundary Value Problems: Computing and Modeling (5th Edition) (Edwards/Penney/Calvis Differential Equations)

C. Henry Edwards, David E. Penney, David Calvis

Differential Equations and Boundary Value Problems: Computing and Modeling (5th Edition) (Edwards/Penney/Calvis Differential Equations) C. Henry Edwards, David E. Penney, David Calvis

For introductory courses in Differential Equations.

This best-selling text by these well-known authors blends the traditional algebra problem solving skills with the conceptual development and geometric visualization of a modern differential equations course that is essential to science and engineering students. It reflects the new qualitative approach that is altering the learning of elementary differential equations, including the wide availability of scientific computing environments like Maple, Mathematica, and MATLAB. Its focus balances the traditional manual methods with the new computer-based methods that illuminate qualitative phenomena and make accessible a wider range of more realistic applications. Seldom-used topics have been trimmed and new topics added: it starts and ends with discussions of mathematical modeling of real-world phenomena, evident in figures, examples, problems, and applications throughout the text.

From reader reviews:

Charles Settles:

Have you spare time for just a day? What do you do when you have far more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to typically the Mall. How about open as well as read a book eligible Differential Equations and Boundary Value Problems: Computing and Modeling (5th Edition) (Edwards/Penney/Calvis Differential Equations)? Maybe it is being best activity for you. You already know beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with its opinion or you have various other opinion?

William Marquis:

This book untitled Differential Equations and Boundary Value Problems: Computing and Modeling (5th Edition) (Edwards/Penney/Calvis Differential Equations) to be one of several books this best seller in this year, honestly, that is because when you read this book you can get a lot of benefit onto it. You will easily to buy this book in the book retail outlet or you can order it by means of online. The publisher in this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Touch screen phone. So there is no reason for you to past this reserve from your list.

Nicole Dilbeck:

Spent a free time for you to be fun activity to accomplish! A lot of people spent their down time with their family, or their very own friends. Usually they doing activity like watching television, gonna beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Do you want to something different to fill your personal free time/ holiday? May be reading a book is usually option to fill your totally free time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to try out look for book, may be the reserve untitled Differential Equations and Boundary Value Problems: Computing and Modeling (5th Edition) (Edwards/Penney/Calvis Differential Equations) can be fine book to read. May be it is usually best activity to you.

Belinda Smith:

Is it anyone who having spare time and then spend it whole day by simply watching television programs or just laying on the bed? Do you need something new? This Differential Equations and Boundary Value Problems: Computing and Modeling (5th Edition) (Edwards/Penney/Calvis Differential Equations) can be the respond to, oh how comes? A fresh book you know. You are thus out of date, spending your time by reading in this new era is common not a nerd activity. So what these publications have than the others?
