## Underwater Acoustic Digital Signal Processing and Communication Systems

Underwater acoustic digital signal processing and communications is an area of applied research that has witnessed major advances over the past decade. Rapid developments in this area were made possible by the use of powerful digital signal processors (DSPs) whose speed, computational power and portability allowed efficient implementation of complex signal processing algorithms and experimental demonstration of their performance in a variety of underwater environments. The early results served as a motivation for the development of new and improved signal processing methods for underwater applications, which today range from classical of autonomous underwater vehicles and sonar signal processing, to remote control underwater wireless communications. This book presents the diverse areas of underwater acoustic signal processing and communication systems through a collection of contributions from prominent researchers in these areas. Their results, both new and those published over the past few years, have been assembled to provide what we hope is a comprehensive overview of the recent developments in the field. The book is intended for a general audience of researchers, engineers and students working in the areas of underwater acoustic signal processing. It requires the reader to have a basic understanding of the digital signal processing concepts. Each topic is treated from a theoretical perspective, followed by practical implementation details. We hope that the book can serve both as a study text and an academic reference.

### **From reader reviews:**

#### **Gary Glover:**

Nowadays reading books become more than want or need but also be a life style. This reading addiction give you lot of advantages. Advantages you got of course the knowledge the rest of the information inside the book which improve your knowledge and information. The info you get based on what kind of book you read, if you want drive more knowledge just go with knowledge books but if you want truly feel happy read one using theme for entertaining including comic or novel. The actual Underwater Acoustic Digital Signal Processing and Communication Systems is kind of guide which is giving the reader erratic experience.

#### **Susie Vadnais:**

This book untitled Underwater Acoustic Digital Signal Processing and Communication Systems to be one of several books in which best seller in this year, honestly, that is because when you read this book you can get a lot of benefit on it. You will easily to buy this kind of book in the book shop or you can order it via online. The publisher in this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Mobile phone. So there is no reason to your account to past this guide from your list.

#### **Willie Quinones:**

That reserve can make you to feel relax. This particular book Underwater Acoustic Digital Signal Processing and Communication Systems was colorful and of course has pictures on there. As we know that book Underwater Acoustic Digital Signal Processing and Communication Systems has many kinds or category. Start from kids until teenagers. For example Naruto or Investigator Conan you can read and think that you are the character on there. So , not at all of book usually are make you bored, any it can make you feel happy, fun and relax. Try to choose the best book for you personally and try to like reading this.

#### **Helen Jackson:**

Reading a guide make you to get more knowledge from it. You can take knowledge and information from a book. Book is written or printed or highlighted from each source in which filled update of news. On this modern era like currently, many ways to get information are available for anyone. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just seeking the Underwater Acoustic Digital Signal Processing and Communication Systems when you essential it?
