Modeling the Environment: Techniques and Tools for the 3D Illustration of Dynamic Landscapes
Bradley Cantrell, Natalie Yates

A single-source guide to harnessing the power of 3D visualization tools for analysis and representation of landscapes

Current technology allows designers to model environmental phenomena and space in new and exciting ways that go beyond the two-dimensional plane. The models, illustrations, and animations that can be created usher in a new paradigm of landscape representation that can become analytical tools as well as beautiful imagery. The text focuses on digital modeling methods that can be used to express rich environments using digital tools to develop, composite, and animate scenes.

This full-color book provides coverage of 3D visualization tools for land planning and landscape architecture. The methods and theories in Modeling the Environment present landscape representation around a core set of ideas—scene, object, terrain, environment/atmosphere, time/dynamics, and the composite—that centers representation on human experience. Supported by www.lab.visual-logic.com, a website offering tutorials and forums, the text shows you how to use Autodesk 3ds Max to create dynamic landscape environments while also referring to a range of other tools including Google SketchUp, Autodesk Maya, and AutoCAD Civil 3D. It also demonstrates how to integrate 3D visualization tools into existing workflows, and offers critical coverage of intelligent drawings and representations, giving you a glimpse at the future of the profession. This book:

- Includes sections intended to build upon one another in order to understand the environment as a composite representation of multiple systems interacting
- Shows how to integrate 3D visualization tools into existing workflows, as opposed to offering an entirely new workflow
- Emphasizes modeling, animation, and simulation as both design analysis tools and presentation tools

Modeling the Environment is essential reading for professionals in landscape architecture, urban planning and design, architecture, and related disciplines who are looking to be at the forefront of technology.

From reader reviews:

Christina Rogers:

What do you about book? It is not important along with you? Or just adding material if you want something to explain what the one you have problem? How about your time? Or are you busy man? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? All people has many questions above. They need to answer that question since just their can do in which. It said that about guide. Book is familiar in each person. Yes, it is proper. Because start from on pre-school until university need this specific Modeling the Environment: Techniques and Tools for the 3D Illustration of Dynamic Landscapes to read.

Holly Taylor:

In this 21st one hundred year, people become competitive in every single way. By being competitive today, people have do something to make these survives, being in the middle of typically the crowded place and notice by surrounding. One thing that sometimes many people have underestimated this for a while is reading. Yep, by reading a publication your ability to survive raise then having chance to stand than other is high. To suit your needs who want to start reading a new book, we give you this Modeling the Environment: Techniques and Tools for the 3D Illustration of Dynamic Landscapes book as basic and daily reading publication. Why, because this book is greater than just a book.

Alan Torrez:

As people who live in often the modest era should be revise about what going on or facts even knowledge to make these people keep up with the era that is always change and move ahead. Some of you maybe will probably update themselves by looking at books. It is a good choice for you but the problems coming to you actually is you don't know which one you should start with. This Modeling the Environment: Techniques and Tools for the 3D Illustration of Dynamic Landscapes is our recommendation to make you keep up with the world. Why, since this book serves what you want and wish in this era.

Laurence Terry:

A lot of book has printed but it differs. You can get it by online on social media. You can choose the most beneficial book for you, science, comedy, novel, or whatever through searching from it. It is referred to as of book Modeling the Environment: Techniques and Tools for the 3D Illustration of Dynamic Landscapes. You can contribute your knowledge by it. Without leaving the printed book, it might add your knowledge and make a person happier to read. It is most critical that, you must aware about book. It can bring you from one place to other place.
